EDUCATION

University of Southern California

BS in Computer Science / Business Administration— GPA: 3.6

Los Angeles, CA

May 2029 (expected)

- Relevant Coursework: Intro to Web Development (HTML/CSS), CSCI 102 (C++)

EXPERIENCE

Nexus Games Labs, Inc. (Atlas Arena)

Remote

Game Development Internship

github.com/wurlino/atlas-game

Jun 2026 – Aug 2026

- Helped plan and design core game systems and mechanics for a 5-person multiplayer wave-survival game in Unity
- Built the in-game shop and coin economy system for the game in Unity, using Netcode for GameObjects to sync purchases and state across users in real time
- Collaborated across a 5-person Git branching workflow, resolving cross-scene reference conflicts during merges and coordinating feature integration
- Learned Unity, C#, and multiplayer networking from the ground up, going from no prior Unity experience to contributing features to the team's live codebase

Wevr

Los Angeles, CA

VR Experience Tester

Mar 2026 – Present

- Selected as one of 20 college students to evaluate immersive VR narratives
- Provided UI/UX and storytelling feedback on VR experiences and shared findings with the development team

My Private Professor

Remote

SAT Tutor

Oct 2025 – Present

- Ran 1-on-1 weekly sessions, diagnosing issues in each student's learning and developing study plans to fix them
- Helped students develop confidence and consistency through targeted practice

PROJECTS

World Cup Predictor

github.com/codytran11/wc-finale-predictor

Machine Learning & Data Engineering

- Built a full ML pipeline in PostgreSQL/Python to predict the 2026 World Cup Final from 150+ years of match data
- Engineered Elo ratings, head-to-head records, and rolling team form via SQL window functions
- Trained Poisson gradient-boosted regression models; validated at 62% accuracy on held-out 2025–2026 matches
- Ran a 100,000-trial Monte Carlo simulation to produce win/draw/loss probabilities, visualized with matplotlib/seaborn

USC Football Tracker

github.com/codytran11/USC-Football-Tracker

iOS Development & Machine Learning

- Built a SwiftUI iOS app exploring 130+ years of USC football history — seasons, results, rosters, accolades
- Built a Python pipeline using the CollegeFootballData API to clean data and engineer ML features
- Trained a game prediction model (2005–2025) with Apple Create ML; integrated Core ML for on-device inference
- Built a 2026 season predictor using Elo-based team strength and matchup features for win probabilities

ORGANIZATIONS

Vietnamese Student Association, USC

Los Angeles, CA

Finance Director

Aug 2026 – Present

- Create and maintain VSA's annual budget with advisement from the President
- Manage VSA's financial records, including USC Credit Union, Zelle, Venmo, and cash transactions
- Apply for and secure grants and funding through USG and UVSA
- Actively manage membership dues, payments, and reimbursements
- Oversee fundraising and sponsorships for the organization

Society of Asian Scientists and Engineers, USC

Los Angeles, CA

SASE Intern

Feb 2026 – May 2026

- Rotated across all executive board functions to gain hands-on exposure in event programming, operations, marketing, and organizational leadership
- Shadowed and supported the External Relations team, assisting with event planning, company outreach, and securing club sponsorships
- Assisted the Finance team with funding requests, coordinating club purchases through Viterbi, and tracking balances

SKILLS

Languages: C++, C#, Python, SwiftUI, HTML/CSS, SQL

Data & Databases: pandas, matplotlib, seaborn, PostgreSQL

Productivity: Microsoft Office (Word, Excel), Google Workspace (Sheets, Docs, Slides, Drive)

Design/Editing: Adobe Photoshop, Canva, Sony Vegas Pro, CapCut

Languages Spoken: Vietnamese (speaking and listening)
